#### Weight

21 g (including the steel hexagon socket screw)

## **INSTALLATION**

### **Installation & Maintenance**

- Before you mount this seat clamp check first if the diameter corresponds with the diameter of the seat tube of the bicycle's aluminium frame
- For assembly of this seat clamp please check the [seat clamp assembly instructions](#)
- Tighten the screw while mounting the seat clamp with a torque of maximum 5 Nm
- Change your seat clamp when you cannot tighten the screw to the recommended torque anymore
- Check if your saddle and the seat clamp are still mounted properly at every ride
